

Freedom of Information Request Number: FOI 6154 – Adult Community Health Services

**1. Please could you let me know if you have plans to or will be tendering for any adult community health services over the next 5-years. Please include plans for physical and mental health services**

We have no plans for tendering community mental health services in the next 5 years. The commissioning landscape is changing significantly however and a review of our strategy in 3 years' time might lead to changes in approach.

With regard to Community Health Services, the CCG will be reviewing services to ensure they meet the NHS Long Term Plan and will publish any future intentions in accordance with legislative requirements in force at that time.
